Step 3 →

Step 2 →

Step 1 →

Step 1: Stand the stained sides upright about 4 feet apart. Have someone hold or lean one against a wall or post. Place the largest shelf with the face-board in the front onto the bottom cleats of the right and left side units. Keep the back of the shelf flush with the back of the side unit. Fasten with the 1-5/8" screws into the predrilled holes of the shelf.

Step 2: Place the third and next largest shelf onto the next set of cleats and fasten with the 1-5/8" screws.

Step 3: Repeat with the next two shelves, ending with the smallest shelf on top.

Step 4: Place the header board (grooved) flush with the top edge and fasten with the 1-5/8" screws into the predrilled holes.

Step 5: Place the back braces on the back of the unit between each of the shelves, 6 inches up from the shelf bottom and fasten with the 1-5/8" screws. The top brace should be positioned 4 inches from the shelf bottom.

Step 6: Fasten the 2" screws into the predrilled holes in the side units connecting the shelves, 4 per side.

Note: Don't forget to have your sign made with your sales message.
