

Tilt Bench Merchandiser Assembly Instructions (F415)

Kit Contains: 1-Display, 8-3" Screws

Tools Needed: Philips Head Power Screwdriver

Step 1 The bench is shipped upside down. Lift legs into vertical position. Turn bench upright and stand on a flat surface. Lift table to tilted position. Square up legs and insert screws into predrilled holes. Two screws per leg.

Features

Tilt for display. Lay flat for watering.

This bench will tilt to 50° as shipped. There is a setting (predrilled holes) for 38° (less steep). If you wish, move the tilting arms. You will want to use the 38° setting for trays that are not separated in the flats. Otherwise they slide as product is removed.

The bench has front stops to prevent tipping.

A wheel kit is available to make the bench mobile.

A wreath hook package is available to convert this plant display into a display for wreaths, garland or Halloween items.
